

Business Insights

Executive Summary

The dashboard highlights overall sales performance, profitability, customer purchasing behavior, and regional performance.

Key Insights

1. Total Sales reached approximately 2.08M, generating approximately 618.81K in profit.
2. Profit Margin is approximately 30%, indicating healthy profitability.
3. Average Order Value (AOV) is approximately 1.04K, suggesting customers spend around 1,040 per order.
4. High-performing product categories contribute significantly to total sales and should remain a business priority.
5. Regional sales performance varies, indicating opportunities for targeted regional marketing.
6. Payment methods are well distributed, demonstrating customer flexibility in payment preferences.

Business Recommendations

- Focus marketing on high-performing categories.
- Improve sales strategies in lower-performing regions.
- Increase AOV through bundled offers and cross-selling.
- Monitor profit margins and optimize operational costs.
- Use dashboard insights for inventory and demand planning.

Project Outcome

Delivered an interactive dashboard that converts retail transaction data into meaningful business insights for informed decision-making.
